Dear Residents of Gitsegukla Village,

Another construction season is upon us and we are proud to announce that Canyon Contracting crews will be back in the village on a full time basis working on upgrades to the reservoir and water distribution systems. We are excited to work closely with the Band Council, Operations and Maintenance Staff and our Contract Administrators to deliver an efficient and functional water system to the residents of Gitsegukla. Initial operations in May and June will involve equipment and construction in the following areas.

- **Six Plex**
 - Landscaping and Hydro-seeding
 - May 6 - 17
- **New Lower PRV Site** (Band Office; Corner of Howe and Ray Charles)
 - Water Main By Pass and Excavation/Install of Pre Cast Vault
 - May 8 - June 8
- **New Reservoir Construction**
 - Materials and construction: Water treatment plant access rd → Water main right of way
 - May 13- July 29

In July, our focus will shift to street by street operations to overhaul the Villages existing water infrastructure system. At this time there will be periodic street closures and water shut off notices issued. Canyon Contracting is committed to keeping the residents of Gitsegukla informed about our operations and will be going door to door to advise affected residences.

Please understand that Canyon is committed to taking every necessary precaution to minimize the overall disturbance to daily life in the village. If you see our crews working or moving materials on your streets please give them a friendly wave and a wide berth! If you see snow fencing around an excavation or equipment, please don't approach. If you notice something in the village related to the construction that just doesn't seem right please notify the band office and make them aware of your concerns.

Thanks to all for your continued kindness and patience as we proceed with the upgrades. We are excited to spend another summer working in Gitsegukla.

Sincerely,

Management, Canyon Contracting.
