PEOPLE OF SEGUKLA MOUNTAIN

COVID 19 Committee Interim Update – 9 February 2021

Current active cases	6
Cases recovered	9
Test results outstanding	7
Total community positive results during pandemic	15

*Test Results outstanding reflect those tests done locally in Gitsegukla. These tests do not reflect tests done at Wrinch, Mills or Bulkley Valley Hospitals. These tests are not counted in the test results outstanding.

All current cases are self-isolating and supported within the community by the health team. Contact tracing is done immediately and those deemed “high-risk” contacts are notified asap.

The COVID Committee will release a weekly update every Tuesday. Should positive test results be received during the week, we will update the community as the results become available.

The community is still in LEVEL 4 lock which means residents only can enter the village. Travel is limited to essential only (groceries, health care, work), no gatherings and essential workers only will be allowed in the village.

Follow the COVID protocol: hand wash, wear a mask and social distance. Keep your bubble limited to those in your home. The best prevention is to treat everyone you cross paths with as positive for COVID.

If you feel sick or have any illness or questions call our nursing team Mary Ann and Randy at 250-849-5231 Local 223. Evening and weekend testing can be arranged by calling 1-844-645-7811

COVID Symptoms include:

Fever	Chills	Nausea and vomiting	cough
Shortness of breath	Runny nose	Headache	
Fatigue	Diarrhea	Loss of appetite	
Muscle aches	Sore throat	Loss of sense of smell or taste	

Stay safe everyone and be kind. We will get through this.

Gitsegukla Health and Wellness, 165 Howe Street, Gitsegukla, BC, V0J 2J3
